Pharmacy Program Overview

Your pharmacy program is designed to provide you and your doctor with access to a wide variety of safe, clinically effective medications. We've carefully developed a substantial covered medication list, also known as a formulary, that includes many medications that are available at affordable out-of-pocket costs.

About This Guide

This guide is up to date as of April 1, 2020, and is subject to change. Use it as a reference whenever you need coverage information about your pharmacy program. For the most current and complete information about covered medications, use our Medication Lookup tool at bluecrossma.com/medications.

Mail Order Pharmacy

You can have certain prescriptions delivered right to your door when you order them through Express Scripts®, an independent company that administers your pharmacy benefits on behalf of Blue Cross Blue Shield of Massachusetts. In some cases, you'll pay less for a 90-day supply of maintenance medications (also known as long-term medications) than you would for three 30-day supplies at a retail pharmacy. You'll also make fewer trips to the pharmacy and be less likely to miss a dose since you won't have to refill as often.

To get started with the Mail Order Pharmacy, visit Express Scripts at express-scripts.com/starthd, and select **Register**. You can also call Express Scripts at 1-800-892-5119.

Online Resources

Medication Lookup

Search for covered medications, quickly and easily, at bluecrossma.com/medications. Your individual coverage may vary.

MyBlue

It's the simple, secure, and convenient way to manage your health care. Review claims, track medications, and look up plan information. Sign up at bluecrossma.com/myblue.

Express Scripts

Get information about your specific pharmacy coverage by visiting express-scripts.com. There, you can look up the cost of medications, find a pharmacy, and sign up for the Mail Order Pharmacy.

What You Pay for Medications

Our list of covered medications is based on a tiered cost structure. When you fill a prescription, the amount you pay the pharmacy is determined by the tier your medication is on and your benefits. The amount you pay may also include your copayment, co-insurance, and deductibles. The pharmacist will tell you how much you owe. To find your out-of-pocket costs for specific prescriptions, sign in to [express-scripts.com](https://www.express-scripts.com).

Tier Structure and Covered Medications

Medications are placed on tiers according to a variety of factors, including what they're used for, their cost, and whether equivalent or alternative medications are available. Lower-tier medications typically cost less than higher-tier medications. For example, in a 3-tier structure, you'll likely pay the least for Tier 1 medications and the most for Tier 3 medications.

Pharmacy plans can use one of the five different tier structures outlined below. Check your plan materials to see which tier structure your plan uses, and learn more about how medications are covered.*

2-Tier	
Tier 1: Generics	Generic medications are effective, low-cost alternatives to brand-name medications. They're expected to work the same as brand-name medications, and meet the same FDA requirements.
Tier 2: Brands	Brand-name medications cost more than generic medications, so you'll pay more if you use them.

3-Tier	
Tier 1: Generics	Generic medications are effective, low-cost alternatives to brand-name medications. They're expected to work the same as brand-name medications, and meet the same FDA requirements.
Tier 2: Preferred Brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 3: Non-Preferred Brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of generics or preferred brands.

4-Tier	
Tier 1: Preferred Generics	These medications are preferred because they cost less than other generic medications.
Tier 2: Non-Preferred Generics	Non-preferred generic medications cost more than preferred generics, so you'll pay more if you use them instead of preferred generics.
Tier 3: Preferred Brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 4: Non-Preferred Brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of generics or preferred brands.

*Exceptions may apply. For example, the brands and preferred brands tiers could include some generic medications in addition to brand-name medications.

5-Tier	
Tier 1: Generics	Generic medications are effective, low-cost alternatives to brand-name medications. They're expected to work the same as brand-name medications, and meet the same FDA requirements.
Tier 2: Preferred Brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 3: Non-Preferred Brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of generics or preferred brands.
Tier 4: Preferred Brand Specialty	These specialty medications are preferred because they're safe, effective alternatives to more expensive brand-name specialty medications.
Tier 5: Non-Preferred Brand Specialty	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of generics or preferred brand specialty medications.

6-Tier	
Tier 1: Preferred Generics	These medications are preferred because they cost less than other generic medications.
Tier 2: Non-Preferred Generics	Non-preferred generic medications cost more than preferred generics, so you'll pay more if you use them instead of preferred generics.
Tier 3: Preferred Brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 4: Non-Preferred Brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of generics or preferred brands.
Tier 5: Preferred Brand Specialty	These specialty medications are preferred because they're safe, effective alternatives to more expensive brand-name specialty medications.
Tier 6: Non-Preferred Brand Specialty	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of generics or preferred brand specialty medications.

*Exceptions may apply. For example, the brands and preferred brands tiers could include some generic medications in addition to brand-name medications.

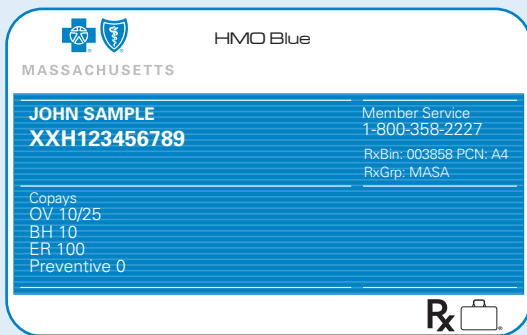

For more information about your pharmacy benefits, sign in to your MyBlue account at bluecrossma.com/myblue.

Compounded Medications

Covered compounded medications that require a prescription will be processed at your highest pharmacy benefit tier, regardless of the ingredients in the medication. Compounded medications are made to order by a pharmacist when existing, commercially available medications don't meet your specific needs as determined by your doctor. Some compounded medications may need Prior Authorization, have Quality Care Dosing guidelines, or require an exception.

Covered Medications List Changes

Our covered medications list may change from time to time. These changes may include changing medications to a non-covered status, changing medication tier status, applying Quality Care Dosing limitations, and/or moving medications to a specialty pharmacy. We notify any impacted members of these changes via direct mail at least 30 days in advance of the change.

Your ID Card

Your ID card contains important information about your pharmacy benefits. Be sure to bring the card with you and give it to your pharmacist when you fill a prescription. A sample ID card is shown at the left.

Over-the-Counter Medications

For non-grandfathered health plans under the Affordable Care Act (ACA), the following list includes over-the-counter medications that are covered at no cost to you when they're prescribed by your doctor. This list is up to date as of April 1, 2020, and may change from time to time.

- **Generic Aspirin (81mg)**
- **Generic Folic Acid** is covered for people up to age 50
- **Generic Iron** is covered for infants up to 12 months old
- **Generic Smoking Cessation** (such as nicotine gum, lozenges, and patches) is covered for up to two 90-day supplies per calendar year
- **Generic Vitamin D** is covered for people aged 65 and older
- **Generic contraceptives** (such as female condoms, sponges, and spermicide) are covered

Benefit Exclusions

The following are considered benefit exclusions under your policy. This means these medications and other health products aren't covered, and exceptions aren't available. Some medications within these categories have over-the-counter alternatives available. This list is up to date as of April 1, 2020. See your subscriber certificate for additional exclusions.

- Anorexiant
- Cough and cold products that contain one or more of the following ingredients in equivalent over-the-counter doses: guaifenesin, chlorpheniramine, pseudoephedrine, phenylephrine, clemastine, dextromethorphan, and pyrilamine
- Non-sedating antihistamines
- Ophthalmic drug solutions to treat allergies
- Inhaled nasal steroids
- Proton pump inhibitors (PPI), except for prescription proton pump inhibitors that are prescribed for members under age 18 or prescribed as part of a combination drug used to treat helicobacter pylori
- Topical acne medications (benzoyl peroxide products 10% in strength or less, and some combinations)
- Pharmaceuticals that you can buy without a prescription, except as described in this Pharmacy Program booklet
- Medical supplies such as dressings and antiseptics
- Combination vitamins that require a prescription, except for: prescription prenatal vitamins and pediatric vitamins with fluoride

Quality Care Dosing

Our Quality Care Dosing program helps to ensure that the quantity and dosage meet the Food and Drug Administration's (FDA) regulations, clinical standards, and manufacturer's guidelines of the medications you receive. When you fill a prescription for one of the following medications, it's checked electronically in two ways:

Dose Consolidation

Checks to see whether you're taking two or more pills a day that can be replaced with one pill providing the same daily dosage

Recommended Monthly Dosing Level

Checks to see that your monthly dosage is consistent with the FDA's and manufacturer's monthly dosing recommendations and clinical information

You may fill a quantity up to the allowed limit, but quantities greater than the allowed limit will be denied.

Note: Your doctor may request an exception for medications that are subject to Quality Care Dosing when medically necessary. Some medications on this list may also be subject to Step Therapy and/or Prior Authorization requirements, be considered non-covered, or be considered a specialty medication. Please check the corresponding pages to determine coverage requirements.

This list of medications in our Quality Care Dosing program is up to date as of April 1, 2020, and may change from time to time.

For the most current list of medications subject to Quality Care Dosing, along with associated dosing limits, use our Medication Lookup tool at bluecrossma.com/medications.

Quality Care Dosing

Abilify Mycite	Apidra	Bunavail	Dexilant (excluded for 18 years and older)
Abstral	Apidra Solostar	Buprenorphine	Dexmethylphenidate ER
AcipHex (excluded for 18 years and older)	Aplenzin ER	Buprenorphine-Naloxone	Dexmethylphenidate XR

Prior Authorization

Your doctor is required to obtain Prior Authorization before prescribing specific medications. This ensures that your doctor has determined that this medication is necessary to treat you, based on specific medical standards.

Another part of our Prior Authorization program is Step Therapy. Please refer to the Step Therapy section in this booklet for more information.

Note: Some medications on this list may also be subject to Step Therapy and/or Quality Care Dosing requirements, be considered non-covered, or be considered a specialty medication. Please check the corresponding pages to determine coverage requirements.

This list of medications that require Prior Authorization is up to date as of April 1, 2020, and may change from time to time.

For the most current list of medications that require Prior Authorization, use our Medication Lookup tool at bluecrossma.com/medications.

Prior Authorization

Abstral	Cimzia	Evekeo	Inflectra

	Synvisc	Xodol	
		Xolair	

Step Therapy

Step Therapy is a key part of our Prior Authorization program that allows us to help your doctor provide you with an appropriate and affordable medication treatment. Before coverage is allowed for certain costly “second-step” medications, we require that you first try an effective, but less expensive, “first-step” medication. Some medications may have multiple steps.

Note: Some medications on this list may also be subject to Prior Authorization and/or Quality Care Dosing requirements, be considered non-covered, or be considered a specialty medication. Please check the corresponding pages to determine coverage requirements.

This list of medications in our Step Therapy program is up to date as of April 1, 2020, and may change from time to time.

For the most current list of medications that require Step Therapy, use our Medication Lookup tool at bluecrossma.com/medications.

Specialty Pharmacy Medications

In our formulary, some medications are referred to as specialty medications. These medications are usually used to treat complex health conditions. We've developed a network of specialty pharmacies that are experienced in dispensing these medications. Members are required to fill most specialty medications through one of the pharmacies listed below. However, if a highly specialized medication isn't available at one of our specialty pharmacies, we'll cover the cost of the medication when it's filled at an in-network pharmacy. For a list of specialty medications, see the following pages.

Specialty Network Pharmacy Contact Information

AcariaHealth™

1-866-892-1202

Fax: 1-877-541-1503

Non-Covered Medications

Your pharmacy program provides coverage for over 4,000 prescription medications. This section lists medications that aren't covered under your benefits. Most medications on our non-covered list have equally safe, effective, covered alternatives for treating the same medical conditions. If a non-covered medication is approved, it will be covered at the highest tier. Check with your doctor about appropriate alternatives if you currently take any of these medications.

Your doctor may request coverage for a non-covered medication if no covered alternative is appropriate for treating your condition.

Note: Some medications on this list may also be subject to Prior Authorization, Quality Care Dosing and/or Step Therapy requirements, or be considered a specialty medication. Please check the corresponding pages to determine coverage requirements.

This list of non-covered medications is up to date as of April 1, 2020, and may change from time to time.

For the most current list of non-covered medications, and to see covered alternatives, use our Medication Lookup tool at bluecrossma.com/medications.

Non-Covered Medications

New Medication Approval Process

Our Pharmacy and Therapeutics Committee (the Committee), which is made up of pharmacists and doctors of various specialties, reviews the effectiveness and overall value of new medications approved by the FDA on an ongoing basis. The Committee provides expertise and advice to help us give our members prescription drug options that meet their medical needs and achieve desired treatment goals. Approved medications are added to our list as they're approved by the Committee throughout the year.

While under review, new medications won't be covered by your plan. As with other medications that aren't covered, your doctor may request coverage when medically necessary. If a non-covered drug is approved, it will be covered at the highest tier.

Nondiscrimination Notice

Blue Cross Blue Shield of Massachusetts complies with applicable federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, sex, sexual orientation, or gender identity. It does not exclude people or treat them differently because of race, color, national origin, age, disability, sex, sexual orientation, or gender identity.

Blue Cross Blue Shield of Massachusetts provides:

Free aids and services to people with disabilities to communicate effectively with us, such as qualified sign language interpreters and written information in other formats (large print or other formats).

- Free language services to people whose primary language is not English, such as qualified interpreters and information written in other languages.
- If you need these services, call Member Service at the number on your ID card.

If you believe that Blue Cross Blue Shield of Massachusetts has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, sex, sexual orientation, or gender identity, you can file a grievance with the Civil Rights Coordinator by mail at Civil Rights Coordinator, Blue Cross Blue Shield of Massachusetts, One Enterprise Drive, Quincy, MA 02171-2126; phone at 1-800-472-2689 (TTY: 711); fax at 1-617-246-3616; or email at civilrightscoordinator@bcbsma.com.

If you need help filing a grievance, the Civil Rights Coordinator is available to help you.

You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights online at ocrportal.hhs.gov; by mail at U.S. Department of Health and Human Services, 200 Independence Avenue, SW Room 509F, HHH Building Washington, DC 20201; by phone at 1-800-368-1019 or 1-800-537-7697 (TDD).

Complaint forms are available at [hhs.gov](https://www.hhs.gov).
