PHARMACY PROGRAM OVERVIEW

Your pharmacy program is designed to provide you and your doctor with access to a wide variety of safe, clinically effective medications. We've carefully developed a substantial covered medications list, also known as a formulary, that includes many medications available at affordable out-of-pocket costs.

ABOUT THIS GUIDE

This guide is up to date as of January 1, 2025, and is subject to change. Use it as a reference whenever you need coverage information about your pharmacy program. For the most current and complete information about covered medications, use our **Medication Lookup** tool at bluecrossma.org/medication.

MAIL SERVICE PHARMACY

You can have your maintenance medications, also known as long-term medications, delivered right to your door when you order them through the mail service pharmacy. Most medications are available at a lower cost, and standard shipping is always included. You even have the option to have your medications automatically refilled and shipped every 90 days.

To get started with the mail service pharmacy, sign in to MyBlue or create an account at bluecrossma.org. Once signed in, click **90-Day Mail Service Pharmacy** under **My Medications**. You can also call CVS Customer Care at 1-877-817-0477 (TTY: 711).

GET A PERSONALIZED VIEW OF YOUR HEALTH PLAN WITH MYBLUE

MyBlue is your personalized online member account that makes understanding and using your health plan simple. You can use MyBlue to:

Find, understand,
and use your benefits

Review your
claims details

Look up, price, and
refill medications

Save money with
90-day prescriptions

Find an in-network
pharmacy

Sign in or create your MyBlue account at bluecrossma.org.

HOW TIERS DETERMINE WHAT YOU PAY FOR MEDICATIONS

Our list of covered medications is based on a tiered cost structure. When you fill a prescription, the amount you pay the pharmacy is determined by your medication's tier and your benefits. The amount you pay may also include your copayment, co-insurance, and deductibles. The pharmacist will tell you what you owe at checkout. To find your out-of-pocket costs in advance, sign in to MyBlue or create an account at bluecrossma.org. Once signed in, click **Price a Medication** under **My Medications**.

HOW COVERED MEDICATIONS ARE PLACED INTO TIERS

Medications are placed into tiers according to a variety of factors, including what they're used for, their cost, and whether equivalent or alternative medications are available. Lower-tier medications typically cost less than higher-tier medications. For example, in a 3-tier structure, you'll likely pay the least for Tier 1 medications and the most for Tier 3 medications.

Pharmacy plans can use one of the five different tier structures outlined in this guide. Check your plan materials to see which tier structure your plan uses, and to learn more about how medications are covered.¹

¹ Exceptions may apply. For example, the brands and preferred brands tiers could include some generic medications in addition to brand-name medications.

OUR TIER STRUCTURES

2-tier	
Tier 1: Generics	Generic medications are effective, low-cost alternatives to brand-name medications. They're expected to work the same as brand-name medications, and meet the same Food & Drug Administration (FDA) requirements.
Tier 2: Brands	Brand-name medications cost more than generic medications, so you'll pay more if you use them.

3-tier	
Tier 1: Generics	Generic medications are effective, low-cost alternatives to brand-name medications. They're expected to work the same as brand-name medications, and meet the same FDA requirements.
Tier 2: Preferred brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 3: Non-preferred brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of any generics or preferred brands.

4-tier	
Tier 1: Preferred generics	These medications are preferred because they cost less than other generic medications.
Tier 2: Non-preferred generics	Non-preferred generic medications cost more than preferred generics, so you'll pay more if you use them instead of preferred generics.
Tier 3: Preferred brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 4: Non-preferred brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of any generics or preferred brands.

5-tier	
Tier 1: Generics	Generic medications are effective, low-cost alternatives to brand-name medications. They're expected to work the same as brand-name medications, and meet the same FDA requirements.
Tier 2: Preferred brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 3: Non-preferred brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of any generics or preferred brands.
Tier 4: Preferred brand specialty	These specialty medications are preferred because they're safe, effective alternatives to more expensive brand-name specialty medications.
Tier 5: Non-preferred brand specialty	Non-preferred brand-name specialty medications cost more than preferred brands, so you'll pay more if you use them instead of any generics or preferred brand-name specialty medications.

6-tier	
Tier 1: Preferred generics	These medications are preferred because they cost less than other generic medications.
Tier 2: Non-preferred generics	Non-preferred generic medications cost more than preferred generics, so you'll pay more if you use them instead of preferred generics.
Tier 3: Preferred brands	These are preferred brand-name medications because they're safe, effective alternatives to more expensive brands.
Tier 4: Non-preferred brands	Non-preferred brand-name medications cost more than preferred brands, so you'll pay more if you use them instead of any generics or preferred brands.
Tier 5: Preferred brand specialty	These specialty medications are preferred because they're safe, effective alternatives to more expensive, brand-name specialty medications.
Tier 6: Non-preferred brand specialty	Non-preferred brand-name specialty medications cost more than preferred brands, so you'll pay more if you use them instead of any generics or preferred brand-name specialty medications.

Learn more about your coverage

For more information about your pharmacy benefits, sign in to MyBlue at bluecrossma.org.

COMPOUNDED MEDICATIONS

Compounded medications are made to order by a pharmacist when existing, commercially available medications don't meet your specific needs as determined by your doctor. Covered compounded medications that require a prescription will be processed at your highest pharmacy benefit tier, regardless of the ingredients in the medication. Some compounded medications may need prior authorization, have quality care dosing guidelines, or require an exception.

COVERED MEDICATIONS LIST CHANGES

Our covered medications list may change from time to time. This may include changing medications to a non-covered status, changing medication tier status, applying quality care dosing limitations, and/or moving medications to a specialty pharmacy. We notify any affected members of these changes via direct mail at least 30 days in advance of the change.

Sample ID card for illustrative purposes only.

YOUR ID CARD

Your ID card contains important information about your pharmacy benefits. Be sure to bring the card with you and give it to the pharmacist when you fill a prescription.

OVER-THE-COUNTER MEDICATIONS

For non-grandfathered health plans under the Affordable Care Act (ACA), the following list includes over-the-counter medications that are covered at no cost to you when they're prescribed by your doctor. This list is up to date as of January 1, 2025, and may change from time to time.

- **Generic aspirin** (81mg)
- **Generic contraceptives** (such as female condoms, sponges, and spermicide)
- **Generic folic acid** is covered for people up to age 50
- **Generic smoking cessation** (such as nicotine gum, lozenges, and patches) is covered for up to a 168-day supply per calendar year
- **Generic vitamin D** is covered for people ages 65 and older

OVER-THE-COUNTER NALOXONE AND NARCAN[®] NASAL SPRAY

The over-the-counter naloxone and Narcan nasal sprays are covered at no cost for most members² when purchased at an in-network pharmacy.³ In life-threatening situations, these products can be used to reverse an overdose from opioids. To learn more, visit [cdc.gov/stop-overdose/caring/naloxone.html](https://www.cdc.gov/stop-overdose/caring/naloxone.html).

2. Check your plan materials to see if this benefit is included in your plan.

3. In some cases, a prescription from your doctor may still be required when purchasing the over-the-counter nasal sprays outside of Massachusetts.

BENEFIT EXCLUSIONS

The following are considered benefit exclusions under your policy. This means these medications and other health products aren't covered, and exceptions aren't available. Some medications within these categories have over-the-counter alternatives available.

- Anorexiant
- Cough and cold products that contain one or more of the following ingredients in equivalent over-the-counter doses: guaifenesin, chlorpheniramine, pseudoephedrine, phenylephrine, clemastine, dextromethorphan, and pyrilamine
- Non-sedating antihistamines
- Ophthalmic drug solutions to treat allergies
- Inhaled nasal steroids
- Proton pump inhibitors (PPIs), except for prescription PPIs that are prescribed for members under age 18 or prescribed as part of a combination drug used to treat helicobacter pylori
- Topical acne medications (benzoyl peroxide products in 10% strength or less, and some combinations)
- Pharmaceuticals that you can buy without a prescription, except as described in this pharmacy program guide
- Medical supplies such as dressings and antiseptics
- Combination vitamins that require a prescription, except for prescription prenatal vitamins and pediatric vitamins with fluoride

This list is up to date as of January 1, 2025.
See your subscriber certificate for additional exclusions.

QUALITY CARE DOSING

Our quality care dosing program helps to ensure that the quantity and dosage of the medications you receive meet the FDA's regulations, clinical standards, and manufacturer's guidelines. When you fill a prescription for one of the following medications, it's checked electronically in two ways:

DOSE CONSOLIDATION

Checks to see whether you're taking two or more pills a day that can be replaced with one pill providing the same daily dosage.

RECOMMENDED MONTHLY DOSING LEVEL

Checks to see that your monthly dosage is consistent with the FDA's and manufacturer's monthly dosing recommendations and clinical information.

You may fill a quantity up to the allowed limit, but quantities greater than the allowed limit will be denied.

Note: Your doctor may request an exception for medications that are subject to quality care dosing when medically necessary. Some medications on this list may also be subject to step therapy and/or prior authorization requirements, be considered non-covered, or be considered a specialty medication. Check the corresponding pages to determine coverage requirements.

This list of medications in our quality care dosing program is up to date as of January 1, 2025, and may change from time to time.

For the most current list of medications subject to quality care dosing, along with associated dosing limits, use our **Medication Lookup** tool at bluecrossma.org/medication.

PRIOR AUTHORIZATION

Before coverage is approved for certain medications, your doctor must first request prior authorization. Using clinical-based medical standards, the prior authorization process ensures that you meet certain medical criteria, and that the medication being prescribed is necessary to treat you.

Our prior authorization program includes step therapy. Refer to the step therapy section in this guide for more information.

Note: Some medications on this list may also be subject to step therapy and/or quality care dosing requirements, be considered non-covered, or be considered a specialty medication. Check the corresponding pages to determine coverage requirements.

This list of medications that require prior authorization is up to date as of January 1, 2025, and may change from time to time.

For the most current list of medications that require prior authorization, use our **Medication Lookup** tool at bluecrossma.org/medication.

STEP THERAPY

Step therapy, which is a key part of our prior authorization program, ensures that your doctor provides you with an effective and affordable medication treatment. Before coverage is allowed for certain second-step medications, your doctor must first prescribe a more affordable, yet clinically appropriate first-step medication. Some medications may go through multiple steps before being approved.

Note: Some medications on this list may also be subject to quality care dosing requirements, be considered non-covered, or be considered a specialty medication. Check the corresponding pages to determine coverage requirements.

This list of medications in our step therapy program is up to date as of January 1, 2025, and may change from time to time.

For the most current list of medications that require step therapy, use our **Medication Lookup** tool at bluecrossma.org/medication.

SPECIALTY PHARMACY MEDICATIONS

In our formulary, some medications are classified as specialty medications. These medications are usually used to treat complex health conditions. We've developed a network of specialty pharmacies that are experienced in dispensing these medications. Members are required to fill most specialty medications through one of the pharmacies listed below. However, if a highly specialized medication isn't available at one of our specialty pharmacies, we'll cover the cost of the medication when it's filled at an in-network pharmacy. For a list of specialty medications, see the following pages.

SPECIALTY NETWORK PHARMACY CONTACT INFORMATION

NON-COVERED MEDICATIONS

Your pharmacy program provides coverage for more than 4,000 prescription medications. This section lists medications that aren't covered under your benefits. Most medications on our non-covered list have covered alternatives that have proven to be equally safe and effective for treating the same medical conditions. If a non-covered medication is approved, it will be covered at the highest tier.

Check with your doctor about appropriate alternatives if you currently take any of these medications. Your doctor may request coverage for a non-covered medication if no covered alternative is appropriate for treating your condition.

Note: Some medications on this list may also be subject to prior authorization, quality care dosing and/or step therapy requirements, or be considered a specialty medication. Check the corresponding pages to determine coverage requirements.

This list of non-covered medications is up to date as of January 1, 2025, and may change from time to time.

For the most current list of non-covered medications, and to see covered alternatives, use our **Medication Lookup** tool at bluecrossma.org/medication.

HOW TO REQUEST COVERAGE FOR NON-COVERED MEDICATIONS

To request coverage for non-covered medications, your doctor will need to contact our Pharmacy Operations department using one of the methods below, and provide the Massachusetts Standard Form for Medication for Prior Authorization Requests, along with any additional supporting documentation:

PHONE

1-800-366-7778

FAX

1-800-583-6289

Phone and fax are recommended for faster service.

MAIL

Blue Cross Blue Shield of Massachusetts
Pharmacy Operations Department
25 Technology Place
Hingham, MA 02043-4359

TURNAROUND TIME

Standard requests are reviewed within 48 hours of receipt. In certain life-threatening situations, your doctor may request an expedited review, which we'll respond to within 24 hours of receipt.

CRITERIA FOR EXCEPTION REQUESTS

We may authorize coverage based on one of the following criteria:

- You have documented treatment failures with two covered medications.⁴
- You have documented adverse effects to two covered medications, which are significant enough to stop taking the medications.
- There's another specified clinical basis.

Note: If a non-covered medication is approved, it will be covered at the highest tier, and you'll pay the highest out-of-pocket cost for the medication.

4. Or if there is only one covered alternative available for the requested medication, and the alternative medication fails.

APPEALING A COVERAGE DECISION

A coverage decision is a ruling we make about your health care and pharmacy coverage, or the amount of money we pay for health care services and medications. In some cases, we may decide that a service or medication isn't covered, or is no longer covered for you. If you're not satisfied with a coverage decision, you, your doctor, or an authorized representative can appeal the decision within 180 days of the date of the service, or when you receive a notice of the decision, by contacting the Member Appeal and Grievance Program by:

 **PHONE**
1-800-472-2689

 **FAX**
1-617-246-3616
Phone and fax are recommended
for faster service.

 **EMAIL**
grievances@bcbsma.com

 **MAIL**
Blue Cross Blue Shield of Massachusetts
Member Appeal and Grievance Program
101 Huntington Avenue, Suite 1300
Boston, MA 02199-7611

WHAT HAPPENS WHEN AN APPEAL IS DENIED

If your appeal is denied in part or in full, we'll contact you to explain how we reached our decision. We'll also inform you if your appeal qualifies for an external review, and which steps you should take to file the request.

To read your full appeal and grievance rights, refer to your Evidence of Coverage.

APPROVAL PROCESS FOR NEW MEDICATIONS

Our Pharmacy and Therapeutics Committee (the Committee), which is made up of pharmacists and doctors with various specialty backgrounds, reviews the effectiveness and overall value of new medications approved by the FDA on an ongoing basis. The Committee's expertise and advice help us give our members prescription drug options that meet their medical needs and achieve desired treatment goals. Approved medications are added to our list as they're approved by the Committee throughout the year.

While under review, new medications won't be covered by your plan. If it's medically necessary, your doctor can request an exception for coverage. If approved, the medication will be covered at the highest tier.

Blue Cross Blue Shield of Massachusetts complies with applicable federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, sex, sexual orientation, or gender identity. It does not exclude people or treat them differently because of race, color, national origin, age, disability, sex, sexual orientation, or gender identity.

BLUE CROSS BLUE SHIELD OF MASSACHUSETTS PROVIDES:

- Free aids and services to people with disabilities to communicate effectively with us, such as qualified sign language interpreters and written information in other formats (large print or other formats)
- Free language services to people whose primary language is not English, such as qualified interpreters and information written in other languages

If you need these services, call Member Service at the number on your ID card.

If you believe that Blue Cross Blue Shield of Massachusetts has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, sex, sexual orientation, or gender identity, you can file a grievance with the Civil Rights Coordinator by mail at Civil Rights Coordinator, Blue Cross Blue Shield of Massachusetts, 101 Huntington Avenue, Suite 1300, Boston, MA 02199-7611; phone at **1-800-472-2689** (TTY:711); fax at **1-617-246-3616**; or email at **civilrightscordinator@bcbsma.com**.

If you need help filing a grievance, the Civil Rights Coordinator is available to help you.

You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights, online at **ocrportal.hhs.gov**; by mail at U.S. Department of Health and Human Services, 200 Independence Avenue, SW Room 509F, HHH Building, Washington, DC 20201; by phone at **1-800-368-1019** or **1-800-537-7697** (TDD).

Complaint forms are available at **hhs.gov**.
