

Alternatives to Opioid-Based Medications

Opioid-based medications may be prescribed to help manage pain. However, they aren't your only option. Alternative pain management treatment options, such as non-opiate medications and services, are covered by plans with the Blue Cross Blue Shield of Massachusetts formulary. If you prefer not to use opioid-based medications for pain management, talk to your doctor to see if these treatments are right for you.

What's Covered

We cover the alternative treatment options included below. For full coverage information, view your plan benefits.

Non-Opiate Medications

Certain medications covered under your pharmacy benefit are indicated as alternatives to opioids in our pharmacy benefit materials and medication lists. These medications are often classified as:

- Nonsteroidal anti-inflammatory drugs
- Topical analgesics

For more information, go to bluecrossma.com/medications and view the **Covered Medications for Pain Management** under **Important Information**.

Non-Medication Treatment

The following pain management treatments and services are covered under your medical benefit.

Type of Service	Coverage
Physical and occupational therapy	Up to 60 visits per year
Chiropractic treatment	Up to 12 visits per year
Pain medicine specialists	No limit on covered visits if medically necessary
Transcutaneous electrical nerve stimulation	Covered under our Durable Medical Equipment when medically necessary
Acupuncture*	Up to 12 visits per year

The number of visits per year could vary based on your plan. For more information about your coverage for these services, log in to MyBlue at bluecrossma.com/myblue.

Get a Partial Fill of Opioid-Based Medications

If you receive an opioid-based medication, you can choose to partially fill your prescription. There's no extra charge for a partial fill. If you need the rest of the dosage, you can later fill the remainder of your prescription at the same pharmacy within 30 days without paying an additional copay.
